Examples Finder offers a quick, simple and stable tool for locating example sentences for any specified word. It presents its results in a standard window layout and provides you with a list of search results at once. Despite its capability to quickly find example sentences, there are notable inconveniences. The output is visual, so you can't copy the results to word processor. Trending what users say about find example sentences kunti #7726 - 05/18/10 05:42 PMRe: find example sentences The program is really a useful tool which I have found it very usefull in my life. Many a times I am having a problem while studying, i mean I am unable to understand the meaning of a word and I used to find the definition of a word but by using Examples Finder, I am able to find that very quickly. I used to use this for personal purposes to get an example of a phrase of a word. kunti #7726 - 05/18/10 05:43 PMRe: find example sentences i m also using this software for the same purpose i found it very useful while studying and i can say the way it shows the definition of a word is very simple and easy to understand. i think it is a perfect software which should be recommended for people who are willing to understand any language or study the same it gives u a great support for the same. kunti #7726 - 05/18/10 05:43 PMRe: find example sentences honestly i am not a proffesional in the english language but i use this example finder software and it works perfectly and am telling u that it is not only in the english language but i have used it in the other languages like hindi, gujarati and telugu. it also helps me to understand the language easily. kunti #7726 - 05/18/10 05:44 PMRe: find example sentences Great tool. My laptop crashed and I have lost lots of such software that I had downloaded. This one helped me a lot. I had to change the installation directory to the /c drive as the default was not working. kunti #7726 - 05/18/10 05:44 PMRe: find example sentences I am using this tool for over a year now. It is really good and useful,

Examples Finder is a simple-to-use application that can locate example sentences for any specified word. It comes in handy for studying the English language, as well as for quickly figuring out word definitions when you're going through a writer's block. Simple setup and interface Installing this tool takes minimal time and effort, since there are no special options, prerequisite software products, or third-party offers bundled with the setup kit. However, by the look of the fullscreen installer with the solid background color, it's obvious that it hasn't received updates for a long time. When it comes to the interface, Examples Finder adopts a normal window with a simple design and structure, where you can type or paste a word in the dedicated box and click a button to start the quick search operation. Easily find examples by keywords The utility can be instructed to search for whole words only and ignore the case. Moreover, you can pick the scan scope between dictionary phrases (simple or extended), literature, film, fortune cookies, British National Corpus (spoken or written), and Brown Corpus. The search results are immediately displayed in the main window, so you can check out each example per line. The keyword is highlighted in yellow to help you easily spot it. Although there are no buttons integrated for copying, printing or exporting information to file, the first task can be done by selecting text and triggering the Ctrl+C key combination. Evaluation and conclusion The program remained stable throughout its runtime in our tests, without causing the operating system to hang, crash or prompt errors. It carried out scan jobs rapidly while using a low amount of CPU and RAM, so it didn't hamper the computer's performance. Although it hasn't been updated for a long time, we haven't experienced compatibility issues with later Windows models. To wrap it up, Examples Finder facilitates a simple and straightforward solution for finding example sentences based on specified keywords, and it can be easily handled. (C) Copyright 2019 Multilingual-Ebooks.com Data does not persist after.dispose() method is called I am trying to create and use a BigDecimal object from within a filter. The method I'm creating the object from is not going to finish execution, and I'm then going to call.dispose() on the BigDecimal object. The problem is, calling.dispose() causes the filter to not work anymore. b7e8fdf5c8

I'm making an Android app, and I use the three following lines in my class: // without new super.greet(); this.greet(); MyClass.greet(); // with new MyClass mc = new MyClass(this); mc.greet(); //no new or super this.greet(); MyClass.greet(); When I tried to access greet() with super, this or new, the error "cannot resolve method greet()" was showing. I've already tried to use the methods static, but when I added that the error kept going. Why do I need to use super? What does it mean that the app can't find the method? A: Each of those three lines can (in a constructor) return this (if that is the goal of the constructor): // constructor: public class MyClass { public MyClass(MyClass me) { // constructor calls me, which returns this // which is then used as the `this` for the `MyClass.greet` call this.g
