Its like that 1984 game 'DrugWars'. Very addictive. You'll be dealing drugs and making \$\$\$\$. Graphics are.. well what can you expect from a 2000s game, and you are able to find other players drugs, pretty cool.

Would deal drugs again (yes fbi its a game alright) 5/5!. This is a great family game. I've shared this with my family when ever we have family dinners or events and everyone loves it. I love the fact that 2 people can play this game at a time and they have to work as a team. I definitely recommend this.. Golden water and white water bois ;) And also some taunts... Grabbed this while on sale as an alternative to Cities Skylines and simcity4. Waste of money. This game is worse than cities XL series. Stay away.. Buyer Beware game is ABANDONED!!!

Your structures constantly decay, so you must have lots of mechanics to keep everything repaired. However the biggest issue for me was pathing. The mechanics kept getting stuck, so my structures didn't get repaired and were destroyed. Reading the forums, this has been an issue since summer 2016. You can eventually make miners, scientists and utility vehicles, but what's the point, since they're all going to get stuck anyway, making the game even more unplayable.

I spent most of my game time building the items needed to train mechanics, you never have enough. Having to have 2 mechanics per structure is ridiculous, they're slow and take forever to get anywhere (providing you don't have a traffic jam somewhere (pathing!!!!)).

Oddly the habitats all connect, but the mechanics can't pass thru them, but rather have to go around them, causing more delays. They tend to lock in place, so you must build them all over the place instead.

This game needs a grid so you don't place buildings too close together causing even more pathing issues.

Seems to me the most useless building is the launch pad, you don't make any money, so then why would you want to sell anything??

Until atleast the pathing is fixed I highly recommend for you to stay away from this game unless you want a lesson in frustration and a lot of wasted gameplay.

Update 6/16/2017:

Last update was in Sept 2016 adding an overhead view and 3 languages, but no real update since it 's release from EA in July 2016.. good software but cannot find online help for this software.. It gets repetative after a while and navigating the growing world becomes a nuisance. But the first half hour or so is worth the price of admission. The puzzles are interesting and intuitive and I had a really wonderful experience where I just sat in the road tape fpor a while because I found it relaxing. When that tape got corrupted it really sort of shook me. Super cool.. Fun, short detective game. Recommend getting it when it goes on sale but great if you got a few hours to kill.

They definitely learned from the first one on many things. For starters the campaign, once you complete a mission you can go back to it any time to get a higher score or the secondary or hidden objective. The speed up button, unlike the first game it actually speeds things up, and makes that 40 waves go by so much quicker. The addition of other weapons were sorely needed, I found the bombs most useful, but the flamethrower is great as well. The dig in feature is great, but not for every situation.

Unlike last time, because of being able to play any mission completed in the campaign there is no quick play. Instead you get 2 Bonus missions which are cool but not a big deal.

I rated the first one 5/10. This is definitely the better overall game. It feels like they tried to boil down what they wanted tower defence to be and refine it from the first one.

7/10 only because I feel there isn't much long term replay grab it if it goes on sale. Its really fun to get combos in this game.. It's one of those games where if you played it as a kid, it'd probably seem awesome.

Then you play it as a seasoned gamer and realize it's trash.

In all honesty though, this game really just has nothing going for it. Bad story, animations as stiff as a lamp post, glitchy parkour, and more. It tries to combine Assassin's Creed with Gears of War and fails miserably.

Not worth the money at all, even on sale. Get Ride to Hell Retribution, that game is honestly more entertaining (it'll at least make you laugh at how bad it is). And, if you're going to try braving through this game, I highly recommend playing it on LAN co-op with a friend like I did. It made it just a little more bearable.

2/10

P.S: For playing coop with virtual LAN: I didn't try hamachi, but if you use Tunngle then make sure the person hosting the server sets the Network Range emulation to 10.x.x Server Emulation. That's the only one that worked for me.. 10/f\*cking 10 it takes some getting used to definitely and it requires you to set it to keys you can press without reaching over your other arm or quickly letting go of the look buttons but i thoroughly enjoyed playing this awesome game, ive always wanted to just fly ships and shoot stuff and this is the exact game to play when youre bored, good music, pretty ok graphics and a smooth way to play, again its a bit weird when getting used to the controls but hell does it feel good once you do it. As a horror game , is the first riddle too difficult? Who can tell me how to deal with it .... I had waste an hour at the first riddle . and when i started a new game, I missed my key , and where is it ? I hope I can enjoy it,, but you can't make me fell defeated at first . ... So who can tell me what is the picture's mean that on the wall . Could you see it? author?

Restoration is a game that is supposed to be short and sweet. It is in fact that, but it finished a long time ago, but still received some after care. I didn't mind helping it a bit more when I could, but for what I had envisioned, it's complete. Therefore all updates are finished for Restoration.
